SIM activation

Dear Customer,

This device is equipped with a SIM card. The SIM card has not been activated yet. The mobile data subscription costs 6 SenseAnywhere Credits per year.

How to activate the SIM?

In order to activate the SIM card:

1. Register the Mobile AccessPoint in SACLient.
2. Make sure you have at least 6 Credits per Mobile AccessPoint on your Credits' Balance.
3. Go to: www.saclient.com/sim.
4. Please press the green button behind the AccessPoint you would like to activate and confirm the popup.
5. SenseAnywhere will activate the SIM card with the provider. The activation of the SIM card might take up to one day.
6. We will inform you by e-mail when the SIM card is activated.

Note

- At the end of each subscription year, another 6 Credits will be automatically deducted for the next year's subscription.

Fair Use Policy

This SIM card comes with a Fair Use Policy designed to ensure fair data usage. It is primarily intended for transport use, connecting a Mobile AccessPoint with a few loggers in a vehicle.

If you plan to use the SIM in contexts with higher data demand, such as warehouses, buildings, or mapping operations with numerous connected loggers, please be aware that this subscription might not meet your needs. In such instances, we highly recommend using your **own SIM card**. Please contact your distributor if you have any queries regarding this policy or if your SIM usage needs are more extensive.

In cases where our Fair Use Policy is breached, we reserve the right to apply additional charges to your account to cover the extra data usage. In more severe cases or repeated breaches, we may even remotely disable the SIM card to prevent further policy violations.
